

NMDB - the European neutron monitor database

Christian T. Steigies, Christian-Albrechts-Universität, Kiel
Karl-Ludwig Klein, Observatoire de Paris, Meudon
for the NMDB consortium

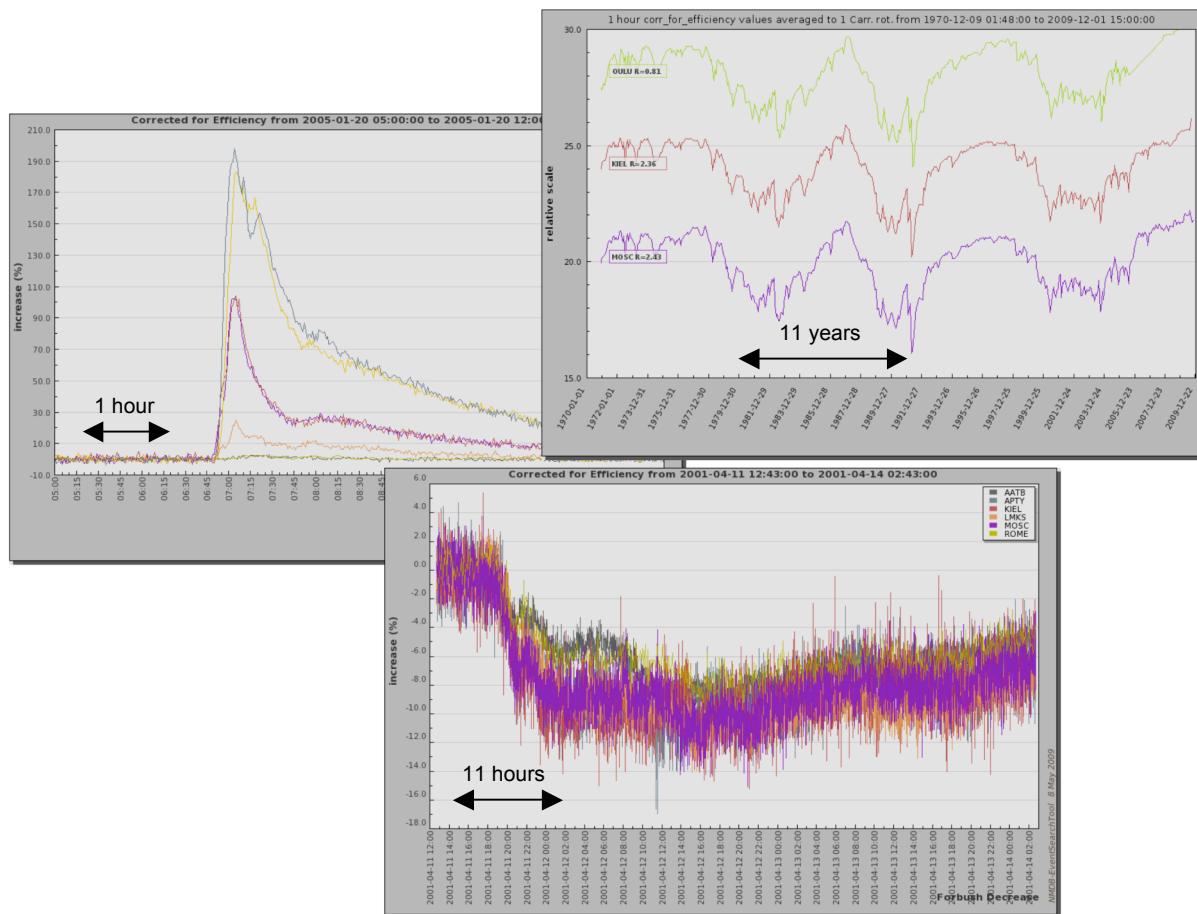

NMDB data providers

- 26 stations from Europe and some neighbouring countries
- Historical data and real-time data (1 min resolution) - depending on station

NMDB data: examples

- Long term trends (solar modulation)
- Individual events: Forbush effects & ground level events (GLE)
- Easy-to-use tool for data visualisation and retrieval (ASCII)
